# UNIFORM CRIME REPORTS

J. Edgar Hoover, Director, Bureau of Investigation

United States Department of Justice

Washington, D. C.

Volume 2

October, 1931

Number 10

## Contents of the October Bulletin.

The number of crimes known to contributing police departments as submitted by them to the Bureau of Investigation for the month of October is set forth in the regular tables published in the current bulletin. Table I contains the number of offenses as reported by urban police departments, and Table I-A those furnished by counties, possessions, and others. Reports for months previous to October received since the September issue of the bulletin, and revised returns, which are those already published but in which some adjustments have been made, are contained in Tables II, II-A, and II-B. Other tables in the bulletin show the extent of the population area covered by the returns, the number of current and supplementary returns received during the year, the average daily number of offenses, and the per cent of each offense class to the total number reported.

In addition there is included a table reflecting the number of police department employees as indicated by returns received for the first nine months of 1931 and the number of such employees per 1,000 persons for reporting cities of 50,000 or more in population.

The Department of Justice does not vouch for the accuracy of the reports sent in by chiefs of police in different cities. They are given out as current information, which possibly may throw some light on problems of crime and criminal law enforcement.

The term "Offenses known to the police" is designed to include those crimes designated as Part I Classes of the Uniform Classification occurring within the police jurisdiction, whether they become known to the police through reports of police officers, of citizens, of prosecuting or court officials, or otherwise. They are confined to the following group of seven classes of grave offenses, shown by experience to be those most generally and completely reported to the police: Felonious homicide, including (a) murder, nonnegligent manslaughter, and (b) manslaughter by negligence; rape; robbery; aggravated assault; burglary—breaking or entering; larceny—theft, including (a) thefts of \$50 and over and (b) thefts of under \$50; and auto theft. The figures contained herein include also the number of attempted crimes of the designated classes. Attempted murders, however, are

reported as aggravated assaults. In other words, an attempted burglary or robbery, for example, is reported in the monthly bulletin in the same manner as if the crime had been completed.

"Offenses known to the police" include, therefore, all of the above offenses, including attempts, which are reported by the police departments of contributing cities, and not merely arrests or cleared cases.

**Population table.**

The number of cities which at any time during the year 1931 have contributed returns of offenses known to the police to the Bureau of Investigation reached 1,437 in October. The population represented by those cities is 50,407,853. This figure, of course, excludes the population represented by returns received from county and other jurisdictions. Returns were also received from a number of counties in the various States, State police in several jurisdictions, the third division of Alaska, Canal Zone, and Porto Rico. Supplementary returns were forwarded from various other possessions. In the following table are shown the number and per cent of the cities and the number and per cent of the population of those cities of more than 10,000 inhabitants from which returns have been received for any one month of 1931. In addition to those listed in the table there are 687 cities of the smaller population groups and rural townships representing an aggregate total population for both groups of 3,943,347, which also contributed returns at some time during the current year.

Population groups	Total number of cities or towns	Cities filing returns		Total population	Population represented in returns	
		Number	Per cent		Number	Per cent
Total	983	750	76	58,340,077	46,464,506	80
A. Cities over 250,000	37	34	92	28,784,770	21,330,815	74
B. Cities 100,000 to 250,000	56	54	96	7,540,908	7,288,537	96
C. Cities 50,000 to 100,000	98	90	92	6,491,448	5,923,666	91
D. Cities 25,000 to 50,000	185	158	85	6,425,693	5,561,399	86
E. Cities 10,000 to 25,000	606	414	68	9,097,300	6,360,000	70

The above table does not include 687 cities and rural townships, aggregating a total population of 3,943,347. The cities included in this figure are those of less than 10,000 population filing returns, whereas the rural townships are of varying population groups.

**1,267 Cities Contributed Returns for October.**

During the month of October there was an increase of 22 cities in the number of returns received currently. There were also submitted for that month reports from 15 cities which previously had not furnished crime statistics returns to the Bureau of Investigation. The number of reports received and published monthly during 1931 is set forth in the table which follows. This tabulation does not include supplementary returns.

1 Revised.

## Total Published Returns.

The entire number of returns, including supplementaries, which have been received and published during the year 1931 is shown in the table below. Supplementary returns, as distinguished from current returns, are those which have been received since the last issue of the bulletin for months previous to October. In order to make available figures from the entire reporting area it is requested that police departments forward, if possible, the data for months previous to October of the current year.

It is to be understood that the figures are not intended to indicate crime trends for the particular period, but merely reflect the per cent of each class of the designated crimes to the whole group for the various months. The figures are based on the total number of offenses reported by all contributing cities, exclusive of obviously defective and incomplete returns.

Revised.

**Average Daily Offenses.**

The number of cities which contributed returns for both September and October likewise showed a substantial increase over the number that had previously contributed for any two successive months. The group contributing for the above two months consisted of 1,227 cities. The following table shows the daily average of the number of offenses known of the designated classes for these 1,227 cities for the months of September and October.

*Daily average, 1,224 miscellaneous cities*

	Total	Felonious homicide		Rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—thrift		Auto theft
		Murder, nonnegligent manslaughter	Manslaughter by negligence					\$50 and over	Under \$50	
September, 1931.....	1,918.4	9.6	6.0	8.2	122.1	77.7	392.8	155.0	689.4	477.6
October, 1931.....	2,005.3	8.8	6.0	6.7	129.8	64.3	398.6	163.2	721.0	521.9

The next table of daily averages is based upon figures submitted by 1,147 cities, each having a population of less than 100,000, which contributed returns both in September and October.

*Daily average, 1,147 cities less than 100,000 population*

	Total	Felonious homicide		Rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—thrift		Auto theft
		Murder, nonnegligent manslaughter	Manslaughter by negligence					\$50 and over	Under \$50	
September, 1931.....	680.9	4.1	2.0	4.1	37.1	34.5	142.6	57.2	290.4	138.9
October, 1931.....	726.3	3.7	1.7	3.0	36.7	29.8	145.1	57.6	288.1	160.4

The next table of daily averages is based upon figures submitted by 77 cities, each of a population of 100,000 or more, which contributed returns both in September and October.

*Daily average, 77 cities 100,000 population and over*

	Total	Felonious homicide		Rape	Robbery	Aggravated assault	Burglary—breaking or entering	Larceny—thrift		Auto theft
		Murder, nonnegligent manslaughter	Manslaughter by negligence					\$50 and over	Under \$50	
September, 1931.....	1,237.5	5.5	4.0	4.0	84.9	43.2	250.3	97.9	400.0	338.7
October, 1931.....	1,278.9	5.0	4.3	3.7	93.2	34.5	268.5	95.3	432.9	361.6

**Percentage Table of Part I Offenses.**

The per cent of each offense class to the whole for 1931 is shown by months in the following table. These figures, however, are not intended to indicate crime trends for the particular period, but merely reflect the per cent of each class of the designated crimes to the whole group for the various months. The figures are based on the total number of offenses reported by all contributing cities, exclusive of obviously defective and incomplete returns.

attributed returns both in September and October.

The attention of contributors is invited to the fact that the system of uniform crime reporting, as adopted by the Bureau of Investigation, provides for the preparation of annual reports which are calculated to show the total number of offenses of the designated classes for the year, the number of those offenses which have been cleared by arrest, together with the number of persons charged for those offenses. On or about the 1st of January the necessary forms, which are designated Return B and Return C, will be forwarded to all interested police departments. Officials desiring information concerning the preparation of the annual reports should communicate immediately with the Bureau of Investigation.

[Arranged according to the Uniform Classification of Offenses, Part I]

† Not classified; included in total.

Monthly Return A. It is an average for the month of September, 1931, inclusive. In some instances cities are included which have not provided the data for each month during the period, and in such cases the average number is taken for those months in which the figures are available. Police departments from which it was impossible to obtain the data for a period of more than three months, however, are excluded. Data furnished by other parties which was obviously inaccurate or incomplete has been disregarded.

<sup>1</sup> Previously published as Harrison, N. J.**Tabulation of Police Department Employees.**

There is presented in the table which follows a tabulation showing the number of police department employees, including civilians, for cities contributing crime statistical data to the Bureau of Investigation.

For comparative purposes the cities are herewith classified into three population groups; namely, cities over 250,000, those between 100,000 and 250,000, and those between 50,000 and 100,000. The population data was obtained from the revised 1930 census. The number of police-department employees shown in the table is taken from the monthly Return A. It is an average for the months of January to September, 1931, inclusive. In some instances cities are included which have not provided the data for each month during the above period, and in such cases the average number is taken for those months in which the figures are available. Police departments from which it was impossible to obtain the data for a period of more than three months, however, are excluded. Data furnished by cities regularly which was obviously inaccurate or incomplete has been disregarded.

In an early issue of the Bulletin the same data for cities between 10,000 and 50,000 will be presented.

TABLE A.—Tabulation of police department employees

## 1. CITIES OVER 250,000 POPULATION

	Population, 1930	Average number of employees per month	Number per 1,000 population
